

Dear Customer,

Concerning: REACH company statement

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union regulation on chemicals and their safe use (EC 1907/2006).

Dejond supports the basic aim of REACH in improving the protection of human health and environment and is committed to meet all applicable REACH requirements. Dejond will provide customers information about substances of very high concern (SVHC's) in its products, if those are present above a concentration limit of 0.1% on an article level.

Under REACH, registration of substances which are used in the manufacturing of articles does not apply to Dejond's manufacturing operations. All substances, that require registration, have been (pre-)registered by our upstream suppliers in accordance with REACH.

Dejond's Tubtara products are "articles" as defined in REACH Article 3(3). They do not contain any hazardous substances listed on the REACH authorization list and not release substances under their normal use. Our actual product status regarding REACH defined SVHC's is as follows:

Tubtara products in steel Zinktop, stainless steel 304 or 316 and aluminium are REACH compliant. They do not contain any hazardous substances on the Authorization List or SVHC's on the Candidate List above a 0.1% w/w concentration.

Production of steel zinc plated yellow chromated Tubtara products containing Cr6+ has discontinued completely, in accordance with REACH phase out.

Dejond will continue to work with our upstream suppliers to ensure that our products remain compliant with actual REACH requirements.

Sincerely,

a brand by Dejond nv
